

Champion's Club

As you will notice and have probably heard about, we have done some major renovations in the clubhouse at Fish Lake this winter / spring. As a board, we have been hearing for years from our members that we need to be able to access the bathrooms from inside the clubhouse. This year when the flooring and sewer needed to be replaced we decided to include indoor bathrooms in the project. According to the contractors that we met with, doing this all at one time was much more practical. Estimated costs have come in at approximately \$25,000 for the entire project.

We think you will be well pleased with the end result. We also would like to say a sincere thank you to the contractors and volunteers that have made this project become a reality.

These projects are never cheap and therefore the Fish Lake Board of Directors would like to ask each of you to join us in becoming a "Champion" at Fish Lake. We have not raised memberships, cart rentals, or green fees. We ask that you voluntarily add \$100 on top of your membership and cart shed rental to become a "Champion". The Champion's Club funds will be used solely for costs associated with this renovation project. All donors will be honored on a plaque that will read *Fish Lake Champions Club*. You can include your name or the name of your business on the plaque. You can also join as many times as you like, with each \$100 donation receiving recognition.

We are the ones that have to keep Fish Lake viable and we feel we have made a very good investment. We hope that you will enjoy the improved facility and will help us to ensure the financial strength of the country club we all love.

Sincerely,

Fish Lake BOD
